

JUNE

Monthly Home Maintenance

CLEAN THE GRILL

It's easy to do and your food will taste even better.

CEILING FANS

Reverse the setting on your ceiling fans counterclockwise. This pushes the air down, creating a nice breeze.

PLAN FOR EXTREME HEAT

Check weather stripping around windows and doors and replace if necessary to help keep the cool air in. Cover windows that receive morning or afternoon sun with drapes.

CONDUCT PEST CONTROL

Warm weather brings out (and in) bugs and pests. Block all potential entrances to attic and crawl spaces with durable materials like wire mesh or sheet metal, and seal all cracks and openings in your home's exterior, including holes for wiring. A persistent animal can widen almost any crevice or opening.
